

Sports Premium Funding Report Academic Year 2019/20

The school tracks data across an academic year to allow for comparisons. This year has been affected by COVID19.

With no events or clubs taking place from March to end of July 2020 no comparisons can be made to previous years.

Data is tracked and reviewed termly which allows plans to be adapted to target specific year groups/pupil groups participation (e.g. SEND/PP). The Autumn data was comparable to the 18/19 academic year. Analysis identified that additional provision was required to improve participation rates for children in receipt of PPG and SEND. Plans were made but however were not implemented due to the global pandemic.

This September, although all children are back in school, sports provision is significantly impacted by COVID19 risk assessment and there are currently no after school clubs or sporting events running. Once restrictions are lifted, we will reinstate this provision and work with the Blackwater partnership to organise events. At that point we will track data and analyse impact.
